Pointers

1)
```
int a =5;
int * ptr = &a;
int * ptrtoptr;

int ptrtoptr = &ptr;
```

a | 5

address = 100

ptr

address=104

ptrtoptr

address:108
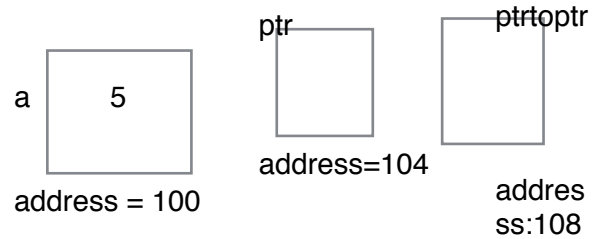

What is ptr?

What is ptrtoptr?

What is *ptr?

What is **ptr?

What is &a?

What is *&a?

What is *a?

What is **a?

What is &ptr?

What is *ptrtoptr?

What is **ptrtopointer?

2)Please write a valid swap function.

3)Please write a valid strcpy function
